

Solution exercise 3

```
nums = [ ]
while True:
    n = input("Enter a number: ")
    if n == "done":
        break
    try:
        nums.append(int(n))
    except ValueError:
        print ("Invalid input")

print( "Min: %d" % min(nums))
print("Max: %d" % max(nums))
```
